DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tavor et al. (US 6,070,149), in view of Bezos et al. (US 6,029,141).

Tavor et al. disclose a commercial sales method and system, comprising: registering in advance a specific-item catalog and a relevant-item catalog in a home page on the WWW (see, in particular, column 16, lines 17-37, and Figure 11); a purchaser viewing the specific-item and relevant-item catalogs on the home page via a network by means of a terminal, and sending a purchase request to a relevant-item seller selling the items relevant to the specific item designating one of the relevant items; the relevant-item seller delivering the purchased item to the purchaser in accordance with the purchase request; and, the relevant-item seller informing a settlement computer of sales data of the purchased item, but in the method and system of Tavor et al., one seller sells both the specific item and the relevant item, rather than one seller selling the specific item and a separate seller selling the relevant item.

Application: 09/825,337

Art Unit: 3627

However, Bezos et al. disclose a similar commercial sales method and system, and Bezos et al. indeed disclose two separate sellers working together, with the seller actually selling the product paying a commission to the other seller whose WWW home page generated the sale.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have modified the method and system of Tavor et al. so as to utilize two sellers working together rather than one unitary seller, in accordance with the teachings of Bezos et al., in order to generate increased sales by attracting a larger customer base by offering a greater number and selection of products for customers, particularly specialty/low-volume products, without having to incur additional inventory/carrying costs.

Regarding claims 2-3 and 6-7, the method and system of Tavor et al. keeps track of the purchase history of the purchaser (see, in particular, column 40, line 61 et seq.), but since there is no second seller, Tavor et al. disclose neither requesting permission from the purchaser to divulge the purchase history to the other seller, nor reducing the commission paid to the other seller with reference to the purchaser history data. However, asking permission to divulge a purchaser's history data and reducing the amount of commission paid for subsequent referrals after an initial referral are both well known, hence, obvious steps to follow in an online commercial sales method and system. Therefore, it would have been obvious to further modify the method and system of Tavor et al. so as to ask permission of the purchaser to divulge the purchase history of the purchaser to the other seller and pay the other seller less commission based on the purchase history, as is well known to do, in order to appease customer's privacy

Application: 09/825,337 Page 4

concerns and compensate referral sales in accordance with their value (i.e. pay less for subsequent referrals because a customer is more likely to return to a site once he knows about the site and has done business there), since so doing could be performed readily and easily by any person of ordinary skill in the art, with neither undue experimentation, nor risk of unexpected results.

Regarding claims 4 and 8, the method and system of Tavor et al. includes sending the relevant-item seller a request for discounting the item designated for purchase and the relevant-item seller sending the purchaser an acceptance of the request, wherein the purchaser purchases the item for the discounted price after the purchaser receives the acceptance of the discount. See, in particular, column 14, lines 1-9, and Figure 7, block 98, the presentation to the seller by the purchaser of a coupon being considered "a request for a discount."

Art Unit: 3627

Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to the disclosure.
- 4. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, Jerry O'Connor, whose telephone number is (703) 305-1525, and whose facsimile number is (703) 746-3976.
